SmartPaper

Smartpaper is a data collection and analysis platform that allows users to create custom forms for digital logbooks, digital field sampling and digital rounds collection activities. It provides users with a web-based interface for creating, deploying, and managing, as well as a mobile app for inputting data in the field.

Specifications

Feature	Description
Form builder	Drag-and-drop interface for creating custom forms with various question types, skip logic, and validation rules.
Data collection	Collect data via the HTML5 web application
Offline data collection	Allows users to collect data in areas with limited or no internet connectivity, and automatically syncs data when a connection is available.
Data visualization	Real-time visualization of data collected in the field through charts, graphs, and maps.
Data management	Data can be exported in various formats, including CSV, XLS, and SPSS, and can be integrated with other data management tools.
Data security	Data is securely stored on servers, which are compliant with industry-standard security protocols.
QR Code	Use a QR at site to scan to open correct logbook automatically.
Third-party integrations	Integration with other platforms and applications through APIs
